

Short presentation on AMU

Krzysztof Pomorski and Borys Wrobel (www.evosys.org)

Adam Mickiewicz University, Poznan, Poland

October 14, 2015

- 1 Location
- 2 Basic facts
- 3 Faculties
- 4 Science

Localization : Poland → Poznan → UAM
→ Faculty of Physics

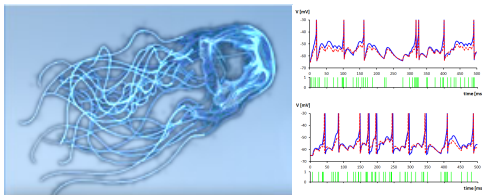

Poznan is city with 550000 inhabitants and as old as Poland (more than 1000 years).

Basic facts

- Founded on May 7, 1919,
- Adam Mickiewicz is the name of Polish poet
- Number of students: 42749
- Number of workers: 5489 (academic teachers: 3095)
- 15 facultiess.

- Faculty of Physics (host of lectures at UAM)
- Faculty of Biology
- Faculty of Mathematics and Computer Science
- Faculty of Chemistry
- Faculty of English
- Faculty of Polish and Classical (Hellenistic and Latin) Philology
- Faculty of Theology
- Faculty of Education Studies
- Faculty of Pedagogy and Artistics Science
- Faculty of Modern Languages and Literatures
- Faculty of History
- Faculty of Geographical and Geological Sciences
- Faculty of Law and Administration
- Faculty of Social Sciences
- Faculty of Political Science and Journalism

Our main interest is in building biologically-inspired systems ('brains', 'bodies'), combining various time scales: behaviour, development and evolution. Our research lies at the intersection of artificial life (including artificial embryology), evolutionary biology and computational neuroscience. We are developing artificial life software platforms and tools for the analysis of evolution of genomes, evolution and complexity of gene regulatory networks, and for the analysis of biological diversity.

The End
